

STEER YOUR FUTURE IN ENVIRONMENTAL HEALTH SCIENCE

STEER: Short Term Educational Experiences for Research, a National Institute of Environmental Health Sciences Internship administered by the Center for Occupational and Environmental Health at the University of California, Berkeley

DESCRIPTION

This internship is a paid 40-hour, 9 week commitment.

- Dates: Monday, June 12 – Friday, August 11

Prepare yourself for future academic and career opportunities in environmental health science with a STEER Internship. Gain valuable research experience and transferable skills working with faculty mentors.

DURING THIS INTERNSHIP, YOU WILL:

- Participate in weekly seminars with faculty
- Learn about the research process and the responsible conduct of science
- Meet and talk with current graduate students and postdocs to learn more about continuing in graduate studies in the field of environmental health sciences
- Participate in virtual occupational and environmental health field trips
- Present the findings from your summer of research at a virtual symposium

ELIGIBILITY

- Rising Junior or Seniors will be prioritized
- Dedicated interest in obtaining a graduate degree and career in environmental health science
- Open to all universities, colleges, and junior/community colleges
- 3.0 GPA preferred; all with high interest are encouraged to apply
- Submission of application, personal statement, resume, unofficial transcript

APPLY BY MARCH 5

"It was more than just work. It really showed me a lot about research and career guidance that I did not expect and I am sad to have it end, and will cherish my time here."

"My internship experience exceeded my expectations, I was overwhelmed with the amount of support from COEH staff and our STEER cohort."

"I gained skills that I didn't expect to gain during this internship."
