

WEARABLE TECHNOLOGY STUDY PARTICIPANTS NEEDED

Using wearable technologies such as exoskeletons may reduce fatigue and risk of injury in construction workers.

This research study will explore their impact.

Participants will try on different wearable technologies and perform mock-up construction tasks. Experience in construction is preferred but not required.

This study will take place near UC Berkeley and will last up to six hours (minimum time requirement is 4 hours).

All participants will be paid up to \$150.

Free parking is available onsite.
